

## **1 If this is an update:**

- 1.1 Use the current program and make a backup of the last data.
  - 1.2 If you are using your own logo, copy "own.bmp" from the program directory C:\Program Files(x86)\Bsport to any existing directory e.g. C:\Athletics.
  - 1.3 At this stage you can decide if you want to keep the 2016-2019 system if you still want to work on old data. If so, use options 3.2 and 3.3 as guidelines. If not delete the directory C:\Program Files(x86)\Bsport.
- 

## **2 Extract the setup program from the setup2020.zip:**

- 2.1 This can be done in any directory. If you are going to use it more than once it is recommended to extract it directly to a USB or to copy the extracted files to a USB.
  - 2.2 Click on Setup.
- 

## **3 Installation:**

### **3.1 Double click on Setup.exe.**

Click OK

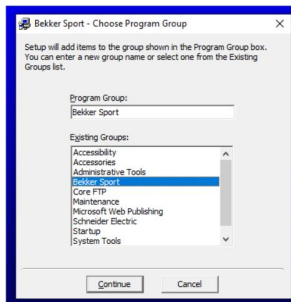

---

### 3.2

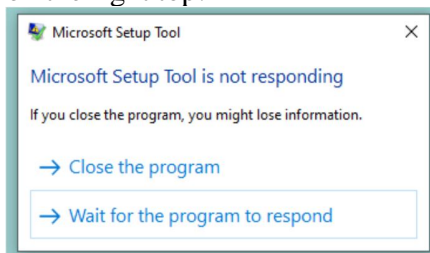

To keep the current version, click Change Directory and type a different location such as BSport2 and then click on the icon. Otherwise just click on the icon.

### 3.3

Again you can change the group if you keep a previous version. click Continue

3.4 sometimes it stays on a light blue screen for a long time. Cancel this using the X on the right top.

select Close the program and in some cases Cancel again. The installation will continue.

### 3.5

If this appears, click Yes. In some cases a similar message will appear but then click on the Ignore option.

## 4 First time use settings:

4.1 If your own logo (own.bmp) was used, copy it back to the program directory.

4.2 Open the program and click on Settings followed by Paths.

4.3 Click on All in one.

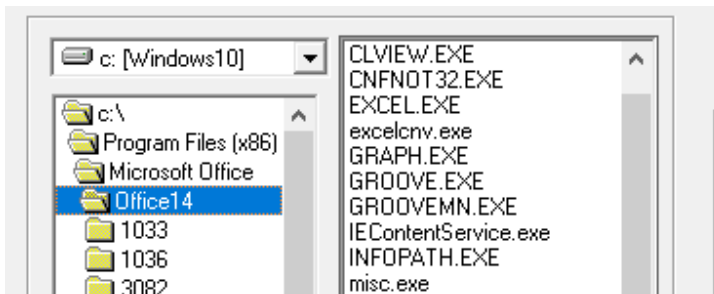

4.4

Normally this will be seen. If you get an error message, repeat 4.2 but now click on all those on the right (Import, Backup, etc.) and on each one click on Create. When all 5 are done, click on Test to get the above.

If all is black, this once-off setting is completed.

4.4 To set the 3 on the left (if shown in red), use the search area in the middle of the screen.

It is normally under C:\Program Files(x86)\Microsoft Office\OfficeNN. where NN can be 10, 12, 14, 15 or 16. In the case of 15 or 16 you may see root and then it is in something like C:\Program Files(x86)\Microsoft Office\root\Office16 Wordprocessor is linked Winword.exe in the right hand list. Click on it and then on Save on the left.

Mark Spreadsheet and link with Excel.exe

Mark E Mail and link with Outlook.exe

4.5 Click test to confirm all was done and it is displayed in black.

4.6 Close the program and open it again.

4.7 Click on Registration.

<b>Days</b>	<b>Key</b>	<b>Media ID</b>
<input type="text"/>	<input type="text"/> - <input type="text"/>	<input type="text" value="BC1E-3621"/>

4.8 To complete the registration you must get the days and key from me. This can be by a call, SMS, WhatsApp or e-mail. The Media ID must be supplied.

---

## 5 Test Windows settings:

After installing it contains a small meeting with just 2 events for this test.

5.1 Click Meeting and then Capture.

1 B-6 60m Final					
Athlete	Team	Performance	Place	ASA	I
bbbb, bbbbb (0)	aa	11.25	1	554	

If the performance is 11.25, then all is correct and completed.

If it is displayed as 11,25 all decimals will be lost during a meeting.

To correct this do the following:

Go to Control Panel and open the Regional Settings.

Under Time and Number formats there will be Additional Settings

The top option is Decimal Indicator. Change the , to . and click Apply and OK.
